WHAT IS VACUUM GLAZING?

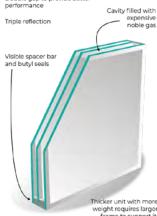

Vacuum Glazing is highly efficient double glazing. Like standard double glazing, it is made with two panes of glass separated by a cavity. However, instead of the usual gas or airfilled cavity, all air is extracted, and the unit is completely sealed.

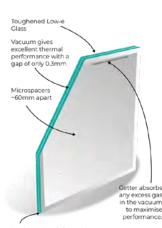

The effectiveness of the vacuum means that the gap between the two panes can be incredibly narrow – around 0.3mm. This narrow gap makes Vacuum Glazing the perfect choice for heritage windows which emulate single glazing. When incorporated into triple glazing, performance is increased without requiring changes to window profiles.

VACUUM GLAZING vs TRADITIONAL GLASS

Even compared to Triple Glazing, Vacuum Glazing has:

- Higher energy efficiency
- Noise reduction
- ✓ Better light transmission
- ✓ Slimmer profile
- ✓ Longer Service Life

LANDVAC ENHANCE

Perfect for Heritage Restoration Projects and Conservation Areas

LandVac Enhance is specifically designed for heritage and conservation projects, offering a slim profile, centre pane U value of 0.4, and standard toughened durability, making it the ideal choice for preserving the authenticity of historical windows while enhancing energy efficiency.

WHY CHOOSE ENHANCE FOR WINDOW RESTORATION?

- ✓ Lowest sightlines of any toughened vacuum unit
- ✓ Toughened as standard
- ✓ 8x fewer microspacers than leading competitor
- ✓ Superior U-value and acoustic rating to any heritage unit on the market
- ✓ Neat and resilient metallic edge seal for longevity and performance
- ✓ Getter placed into glass slot to ensure consistency and quality

COMPARISON: LandVac Enhance vs Single and Slim Double Glazing					
	Single Glazing Low Sightline Slim Double Glazing		LandVac Enhance Vacuum Glazing		
Overall Thickness	4mm	11 - 16mm	8.3mm

LANDVAC PROTECT

Perfect for new builds or security conscious restoration projects where slim profile glazing is important.

LandVac Protect is specifically designed to achieve P2A security performance while also offering a slim profile, a centre pane. U-value of 0.4 and toughened durability. It's the ideal choice for authentic windows with extreme energy efficiency and security performance.

WHY CHOOSE LANDVAC PROTECT?

- \checkmark Historic appearance with no double reflection.
- ✓ Part L compliant with centre pane U-value of 0.4 W/m2K.
- ✓ Part Q compliant with P2A laminate performance.
- ✓ Neat and resilient metallic edge seal for longevity and performance.
- ✓ Superior Acoustic Performance of 40dB.
- ✓ Slim 13.1mm width
